William Park Goes to Omaha.

Division Superintendent at Chevenne and Well Known All Over the West.

Began With Union Pacific and Never Served Any Other Road for Period of Twenty-Seven Years.

William Lee Park succeeds J. M. Gruber as general superintendent of the Union Pacific at Omaha. Mr. Park is at present superintendent of the Wyoming division, with office at Cheyenne, and his selection will prove highly gratifying to his many Utah friends, for he is known here almost as well as in Wyoming. He is a mountain railroader by

ing. He is a mountain railroader by training, but an Easterner by birth, having come originally from Michigan. The Union Pacific is making no mistake in placing him at the head of the transportation and operating department, as he has the distinction of never having served any other road than the Overland. He began his work with the road in 1878, and has never been off the pay roll. He began as a brakeman. In four years he was in charge of a freight crew. For eight years he had a passenger train, and was one of the best-known and most popular conductors handling the fast trains out of Omaha. He certainly must have handled the trains well, for in 1890 he was made superintendent of the line at North Platte and in 1990 came to Cheyenne as division superintendent. He is only 44 years of age, but has proved the best superintendent ever in charge of the difficult Wyoming alvision, and it was under his administration that the line was changed some years ago, work which was most trying to every man connected with the operating department from Cheyenne.

CAUSES MUCH TALK.

Connection of Salt Lake Route Topic of Conversation Yesterday.

The favorite topic of conversation yesterday in local railroad circles was the completion of the Salt Lake Route through to Los Angeles. It is now said that between March 1 and April 1 through trains will be put on, and for the opening no attempt will be made to break any speed records, as the move would be ill-advised. The time will be something like thirty hours for a starter, which can be gradually reduced. As the company expects to participate to a large extent in fruit shipments from Los Angeles, some freight trains may be operated much earlier, but these matters are still undecided.

The main fact is that the road is through and Los Angeles is but 778 miles from Salt Lake. This time next winter a regular exodus from Salt Lake of people going down to enjoy a few weeks of summer weather when the winter is breaking in this city will take place. All through the summer to come the surfeathing will also be an attraction, and, with the reduction in time and expense, its pleasures will be open to many who have heretofore been unable to afford the luxury. completion of the Salt Lake Route

Vice-President Clark and party will arrive Saturday morning and will make the initial trip over the line, starting from here early next week

B. OF L. E. GIVE FINE BALL.

Annual Ball of Engineers Proves a Marked Success

All the engineers had a clearance card est night permitting them to make an unlimited run to Christensen's hall, where the roundhouse foreman had arranged a fine programme of entertainment for those who were off duty. Several tundred responded, and all the stalls and yard sidings were crowded to the marked espacity. Christensen was at the throttle, and with a high pressure of steam, the box full of sand and all white lights showing, he started things going without a stop until midnight.

Occasionally orders were out for extras, and one or two stops were made for punch while at 11 o'clock many took to the eating-house for a meal. With no obstructions and right-of-way over all trains the run was completed on time, at 1 a. m., and when the crowd left the station to report to the superintendent one and all felt as if the trip through Terpsichorean valley had been a signal success.

The annual ball of the locomotive engineers has come to be looked on as one of the events of the year, and the affair last night was a complete success. The hall was decorated with the green, red and white signal flags and lighted interns, and the initials of the lodge in electric letters stood over the south end of the hall. The music was fine and every one had a glarious evening.

What a change that is on the New York Central! With real railroad men from the nountains sent to the four-track line the system will show up wonderfully in the future. It is a foregone conclusion that the talent responsible for the great results on the Harriann lines will find a place in New York.

Hoch Anxious to Return to Chicago.

Admits Identity and Won't Oppose Issue of Extradition Papers.

Arraigned in Police Court and His Photograph Taken for the Rogues' Gallery.

NEW YORK, Jan. 31.-Johann Hoch of Chicago, who was arrested here last night charged with bigamy and wife abandonment after a search extending over the entire country, told the officials at police headquarters today that he is anxious to return to Chicago at once. He wanted to face the charges against him in that city, he said, and has no intention of opposing extradi-tion. Hoch was photographed for the rogues' gallery before being taken to

lady, said he engaged board on Satur-day, and had not been in the house twenty minutes when he asked to be allowed to peel some potatoes for her. Today he proposed marriage, and she then told the police. She added that the man talked a good deal to her yesterday and became much interested in her she thought. her, she thought.

Chief of Police O'Neill declared his belief that Johann Adolph Hoch, alleged to have been married to more than a score of women, has murdered at least twelve of them. This statement was made by Chief O'Neill in a letter written by him to Capt. James J. Langan of the detective bureau of New York, in which he requested the police department of this city to follow a clue given through an anonymous letter received by Inspector of Police Shippy from a woman living at the Beividere hotel. the analysis had not yet been completed. Dr. Lewke said:

"The microscopical examination has shown no poison other than those contained in the medicines and the embalming fluid used by the undertaker, but in the chemical analysis as far as it has progressed there is distinct evidence of extraneous poisoning."

It probably will be two weeks before Hoch is brought back to Chicago.

Some details of the California end to the history of Hoch were learned by Police Inspector Wheeler today.

Mrs. Reichel; widow of a saloonkeeper says that Hoch paid attentions to her across the country from the Pacific coast. According to Inspector Wheeler, Mrs. Reichel has known Hoch as John Hoock for the last five years. When shown a picture of the man today the woman identified it as the man who courted her in 1904. Three letters dated San Francisco, February 12, 15 and 18, 1904, written in German, were given to the police and translated.

"I am the Hoch the Chicago police think they want, but they are wrong. There are lots of Hochs by my name. The story that I am a "Bluebeard" is all foolishness. I'll make somebody feel cheap when I get back to Chicago and prove I am innocent. I never had but two wives in my life."

Some one asked if Hoch meant two at one time. He laughed.

"Do you think I'm a Mormon?" he asked. "I know the stories, but look at me. Would I be fat and happy if I had had a hundred wives?"

He was then asked why he had taken the name of Bartels when he came to New York.

"I expected there would be trouble."

He was then asked why he had taken the name of Bartels when he came to New York.

"I expected there would be trouble about the \$2000 worth of furniture Mary left when she dled," he said. "Her sister wanted more of it than was her share, When I was arrested here I thought it was on account of that furniture."

Relative to stories that Hoch was once said to have worked for Holmes, who operated in Chicago during the World's fair, and killed dozens of people to collect their life insurance. Hoch said:

"I never knew Holmes. He was a chemist I'm a machinist I never did any work for him. I've read about him. I've seen it printed that I was his janitor. It may have been a man who looked like me, and if his name was Hoch that's nothing. There are lots of Hochs."
He said he had no wife at present. Supplementary to Dr. Lewke's statement that a postponement of the Coroner's inquest would be asked pending chemical analysis of the internal organs of Mrs. Marie Walcker Hoch, Coroner Hoffman said this afternoon:

"Traces of polson have been found in the stomach of Mrs. Marie Walcker Hoch through chemical analysis. It is possible that the poison was caused by the embalming fiuld. But when the analysis is completed I believe we will have proof that the woman died from polsoning."

Had a California Wife.

Had a California Wife.

SAN FRANCISCO, Jan. 31—A San Francisco woman has been added to the list of the dead wives of Johann Hoeck or Hoch, suspected of wife murder in Chicago. Four years ago the man lived in this city. He was married to a Miss Long, who kept a bakery on Bryant street She died suddenly of grief, her husband sald, over their son's death. This son was killed in January, 1200, and Mrs. Hoeck died soon afterward. Later Hoeck lived on Clay street where, it is alleged, he courted the landiady's daughter, while writing love letters to another woman in Chicago. At the same time he sald he was engaged to a rich widow in St. Louis, but preferred to live in San Francisco, He stated that he was a Lutheran priest in the East, and later a liquor drummer in California.

BUILDING TRADES ORGANIZE.

Thirty-Three Unions, With 75,000 Members, Unite in One Body.

NEW YORK, Jan. 31.-The largest entral body of building trades unions ver organized in this city, the Associated Bullding Trades, has effected permanent organization. It contains thirty-three unions directly engaged in the building trades, with an aggregate membership of 75,000, and is a much stronger body than even the old Board of Building Trades, of which Samuel Parks was president.

Five representatives from every af-filiated union are in the new organiza-tion, which has an inner body called the board of representatives or walking delegates which will meet every Wednesday. This board will order strikes when authorized by the Associated Building Trades, but has no voting power at regular meetings of the body. The union of Houseariths and body. WOMEN SHOULD WED EARLY.

When Married They Should Workas If They Didn't.

NEW YORK, Jan. 31-In an address efore the League for Education here, Patten, professor of Political Economy of the University of Pennsylvania, has advocated that women should narry early and when married they should work in order to have economic in dependence.

Prof. Patten deplored the fact that so many married women are in the leisure lass. He argued that if the ideal which s held by so many men in regard to the support of their wives is carried on much further it will result in a deterioration of the race and a real danger to society. In order to carry out this plan of economic independence Prof. Patten stated that the standard of life of the family should never fall below that created by the joint income of husband and wife, and under no condition should the wife think of allowing the burden of her support to fall upon her husband until the earning power of the husband until the earning power of the husband until the carning power of the husband until the same the so enlarged as to admit such action. "Lack of income," he continued, "is a reason often advanced against early marriage. While I realize that this kind of a condition offers disadvantages, I believe that where both the man and woman set out in industrial development they will, at the same time develop in character also." urther it will result in a deterioration

PROSPECTORS FIND CAVE.

Located on Line of San Pedro Road Near Caliente.

RENO, Nev., Jan. 31 -- William Andres and William Jones, two prospectors, returned to Reno tonight with reports of the discovery of another strange cave in the southwestern portion of Nevada. The cave has been explored to a depth of 200 feet and shows evidence of a prehistoric race. The cavern is located on the line of the new San Peder road near Callente. It shows signs of habitation.

Between the myrlad stalactites that hang from the walls hieroglyphics have been found. Old stone seats showing signs of use have also been discovered. The men eay that they have discovered mineral wealth in the cave. Assays from the ore give satisfactory returns in gold, silver and other metals. Plain Reasons Are Here Given to Explain Why Lydia E. Pinkham's Vegetable Compound Cures When Doctors Are Powerless

A woman is sick; some disease peculiar to her sex is fast developing in her sys-She goes to her family physician tem. She goes to her family physician and tells him a story, but not the whole She holds something back, loses her

head, becomes agitated, forgets what she wants to say, and finally conceals what she ought to have told, and thus completely mystifies the doctor. Is it any wonder, therefore, that the doctors fail to cure the disease? Still we cannot blame the woman, for it is very embarrassing to detail some of the symptoms of her suffering, even to her

family physician.
It was for this reason that years ago Mrs Pinkham, at Lynn, Mass., de-termined to step in and help her sex. Having had considerable experience in treating female ills with her Vegetable Compound, she encouraged the of America to write to her for advice in regard to their complaints, and being a voman, it was easy for her ailing sis

ters to pour into her ears every detail of their suffering.

In this way she was able to do for them what the physicians were unable to do, simply because she had the proper information to work upon, and from the little group of women who sought her advice years ago a great army of her fellow-beings are to-day constantly applying for advice and re-lief, and the fact that many thousands of them have been cured by following the advice of Mrs. Pinkham during the last year is indicative of the grand results which are produced by ner unequaled experience and training

No physician in the world has had such a training, or has such an amount of information at hand to assist in the treatment of all kinds of female ills. from the simplest local irritation to the most complicated womb diseases.

This, therefore, is the reason why Mrs Pinkham, in her laboratory at Lynn, Mass, is able to do more for the ailing women of America than the family physician. Any woman, therefore, is responsible for her own suffer-ing who will not take the trouble to write to Mrs. Pinkham for advice,

The testimonials which we are constantly publishing from grateful men establish beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.

STRUCK ILLINOIS SENATOR.

Assaulted by Former Member of the Legislature Who Had Grievance.

SPRINGFIELD, III., Jan. 31.-Senator Daniel A. Campbell, the Republican leader Daniel A. Campbell, the Republican leader in the Senate, was struck in the face by ex-Senator Rilley in the upper house to-day, immediately after adjournment. Much excitement followed, and two of Senator Campbell's colleagues, Mueller and Brown, and the sergeant-at-arms, reached for Rilley and ejected him from the chamber and placed him under arrest.

Senator Campbell said he could give no reason for the assault. Riley says he has had grievances against Senator Campbell for a number of years.

"I was chairman of the Committee on Civil Service of the Senate two years ago," he said. "The Senate met an hour before the regular time one day to take up the merit measure, without even notifying me although every other Senator was informed. The bill went through with amendments, for which I was criticated by the Legislative Voters league. My record was attacked and I was defeated for renomination, and hold Senator Campbell and what is known as the Senate combination responsible." Senator Campbell said he could give no
